Subject: Microsoft Settlement

To whom it may concern,

I want to voice my objections to the announced settlement between the US and Microsoft. It seems to be lost on those involved on the US side that Microsoft broke a consent decree on browsers to get in this mess in the first place. This company has demonstrated contempt for honesty and for the American business community, not to mention the legal process. In short they cannot be trusted to hold up their end of this extremely weak and ineffectual settlement. This settlement is bad for consumers and US business in general. The settlement is transparently politically motivated and completely undermines any credibility the Bush administration had. I urge you to reject the settlement and vigorously pursue the just prosecution of the case to save countless US businesses and preserve innovation in the market.
